DINETH MADHURANGA

SOFTWARE ENGINEER

+94 769 058 595 | dinethlaksitha@gmail.com | github.com/Dineth-Madhuranga | linkedin.com/in/dineth-madhuranga

PROFILE SUMMARY

Highly motivated Full-Stack Software Engineer with hands-on production experience designing, deploying, and optimizing web applications. Proven expertise in the MERN stack, Java Spring Boot, and cloud environments (AWS, GCP, Vercel, Railway), with a track record of delivering secure, scalable platforms for government and private sector clients. Transitioned from an internship to a full-time remote engineering role by consistently driving project delivery. Strong background in backend API development (Java Spring Boot, Python FastAPI, Node.js) and mobile integration (React Native), enabling full platform ownership from architecture design to deployment.

TECHNICAL SKILLS

Frontend & Mobile	React.js, React Native, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap, Redux
Backend & APIs	Java, Spring Boot, Node.js, Express.js, Python, FastAPI, RESTful API Design
Databases	MongoDB, MySQL
Cloud & Deployment	Amazon Web Services (AWS EC2, S3), Google Cloud Platform (GCP), Vercel, Railway, Heroku, Render
Tools & CMS	Git, GitHub, Postman, Swagger UI , OpenAPI , Figma, WordPress, WooCommerce, SEO Optimization , Google Search Console

WORK EXPERIENCE

Media Asia Networks Pvt Ltd | Software Engineer (Remote) *Jan 2026 – Present*

- Spearheaded full-stack development for multiple private and government sector web applications utilizing the MERN stack to ensure high scalability and performance.
- Architected and integrated secure RESTful APIs, enabling seamless data flow between front-end interfaces and backend databases.
- Managed remote deployments and server configurations utilizing Google Cloud Platform (GCP) and AWS EC2 to maintain optimal uptime for client applications.
- Collaborated cross-functionally to define architecture standards, optimize database queries, and deliver robust software solutions on tight deadlines.

Media Asia Networks Pvt Ltd | Software Engineering Intern *Jun 2025 – Dec 2025*

- Assisted in the end-to-end development of dynamic web applications using React.js and Node.js.
- Participated in agile workflows, code reviews, and debugging processes to improve code maintainability and eliminate production bottlenecks.
- Built and optimized responsive user interfaces with Tailwind CSS to ensure seamless cross-device compatibility.

Freelance | Full-Stack Web Developer *2023 - Present*

- Engineered a customized POS system for a retail client, reducing checkout time by 20% and improving inventory tracking accuracy by 15%.
- Developed production-grade backend services using Python FastAPI and configured reliable hosting environments on AWS.
- Delivered custom e-commerce platforms utilizing WordPress and WooCommerce, driving up to a 30% increase in online client sales through tailored functionalities.

PROJECTS

Central Province Tourism Registry

- Developed a data-intensive tourism management platform for the Central Province Tourism Board to register foreign tourists, analyze peak seasonal trends, and enhance overall visitor safety.
- Architected a robust Java Spring Boot backend to power three dedicated, role-based dashboards tailored specifically for the Tourism Board, Tourism Police, and Hotel/Guest House Owners to streamline data reporting and secure monitoring.

Tech Stack: Java, Spring Boot, REST APIs, React.js

Silonka - Full-Stack E-Commerce Platform

- Engineered a fully functional, production-ready e-commerce platform encompassing user authentication, dynamic product catalogs, and secure checkout flows.
- Implemented comprehensive on-page SEO strategies, optimizing meta tags, site structure, and loading speeds to maximize organic search visibility.

TechStack: MongoDB, Express.js, React.js, Node.js , Tailwind CSS

Community Crime Incident Reporting System

- Architected a centralized reporting platform designed to streamline incident reporting, mapping, and community awareness for local authorities and citizens.
- Built secure, role-based access control (RBAC) to ensure sensitive incident data is managed safely by administrators while remaining accessible for public reporting.

TechStack: React.js, Python FastApi, MongoDB, REST APIs

EDUCATION

BT (Hons) Information and Communication Technology *2023 - Present*
General Sir John Kotelawala Defence University
